

Releases 2021

Release 1.38 - 13.10.2021

ISSUING API

Changed

- Removed these fields from Card order request: `"previousAddress"` , `"uniqId"` , `"rewardNo"` , `"yearIncome"` .
- Minor text changes for dapi.decta.com documentation as well added missing mandatory signs to fields.
- Changed OTP secret generation from one time password to N-time password.

Fixed

- PIN remind functionality issues for virtual cards with PIN assignation..

Release 1.37 - 02.08.2021

ISSUING API

Added

- New field `"mark-up"` to `v1/api/cards/{ppan}/transactions` request .

Changed

- Renamed "PAN" to "PPAN" in `CardOrder` Status.

Fixed

- PIN remind functionality issues with PIN assign.

Release 1.36 - 27.05.2021

ISSUING API

Added

- New endpoint `POST /v1/api/cards/{ppan}/assign-pin` allows PIN assignation using the web service call.

Changed

- Validation that only Latin alphabet is used for card order address fields. Numbers and special signs are still at use.
- Disabled replacement of virtual cards - should use renewal instead. Replacement allowed **ONLY** to plastic cards.
- Increased max length from 60 to 95 for field `"street"` .

Fixed

- Resolved processTransactions function error by adding a null amount validation.

Release 1.35 - 14.04.2021

ISSUING API

Added

- New endpoint `PATCH /clients/{clientId}/address` allows to change client billing address.

Changed

- Disabled sending of SMS with cardholder data for virtual cards when status is active.

Release 1.34 - 25.02.2021

ISSUING API

Added

- New endpoint `GET /{ppan}/pin-try-counter` returns the PIN try counter of a card.
- New endpoint `POST /{ppan}/pin-try-counter` allows to reset the PIN try counter for a card.

Fixed

- Minor performance improvements and under-the-hood fixes.
